

CANADIAN SPORT SCHOOL

KELOWNA

OVERVIEW

As committed and focused athletes, Canadian Sport School participants are able to bring their physical training into the school day by participating in our multi-sport training program with PacificSport coaching specialists.

A dedicated School District 23 teacher is on staff at the Canadian Sport School to teach and to assist students with their academic studies as required. When finished with training, participants will be transported to their neighbourhood public school with their existing teachers, friends and peers for the remainder of their educational requirements.

ACADEMICS

The majority of the BC graduation program required courses will be delivered through the participant's school of record. These courses, Language Arts, Math, Social Studies and Science, will be delivered in the regular classroom setting with student's peers.

The remainder of their elective courses will be offered by the Canadian Sport School via distributed learning. Elective courses include: Human Performance, Athlete Training, Sports Marketing, High Performance PE, Individual Sports Training and more.

ATHLETICS

Canadian Sport School participants will utilize multi-sport training sessions intended to increase their motor development and physical fitness. The program based in athletics, gymnastics, strength and conditioning, yoga and more increases participants' exposure to a variety of activities, techniques and training elements to improve their overall athleticism.

KELOWNA
